

Care Specialists

Expert neurodiversity & disability support

Our highly qualified Care Specialists offer 24/7, expert, 1:1 guidance and hands-on disability and neurodiversity support for employees, their children, and any adults under their care.

The challenge: A parent was seeking help to get support for their autistic child.

How Care Specialists made a difference:

- ✓ The parent called the Care Specialists team to discuss their unique situation
- ✓ The Specialist gathered important information from the parent
- ✓ The Specialist then provided the parent with an action plan that included:
 - Meeting with school staff and the Special Education Advocate in their district
 - A match to an in-home care agency for after-school care
 - A list of additional local caregivers to manage longer-term care for their son
- ✓ The parent then used this information to establish a care pan for their son

“

Thank you so very much for the amazing service that you have provided to me. You all have helped me by making it easy to identify services that have been difficult to get in my area.

I really appreciate your support.
